

WEBEYE'S DRIVING STYLE ANALYSIS SERVICE, DRIVING STYLE IS ALL NEW!

WHY DID WE RENEW THE SERVICE?

WebEye was pioneer on the market to launch driving style analysis service. Today, the Driving Style service helps drivers of nearly 15 thousand vehicles optimize their driving style and thereby contribute to cutting costs in their business. For us to be able to maintain the same outstanding service for our Customer in the future, the growing number of users and the ever-advancing technology have made it necessary to put the Driving Style service on a new footing.

WHAT WILL I EXPERIENCE USING THE NEW DRIVING STYLE, WHY IS IT WORTH THE TRY?

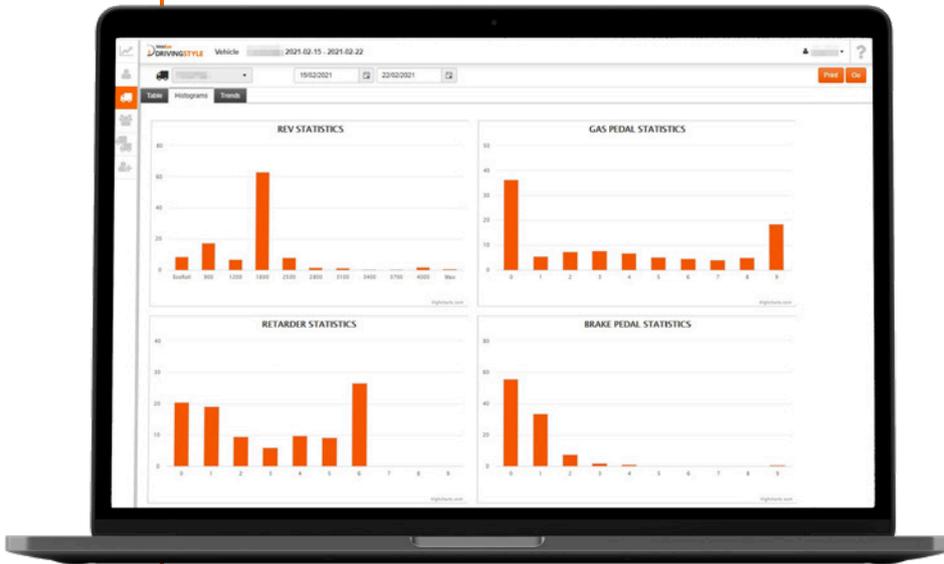

- The new Driving Style offers the usual functions to users on a more transparent and modern platform. The familiar icons help select the functions, tables aid the structuring of data, while easy-to-interpret graphs support their presentation
- Enhanced performance speeds up the running of reports
- New displayed data: Eco-Roll*, the use of which significantly contributes to reducing fuel consumption and is easily monitored from now on
- New speed statistics
- Refined evaluation algorithm makes drivers' rating more objective, enabling the analysis and evaluation of their performance to be based on an even more accurate data
- The new platform provides a more reliable and solid basis for the service, allowing you to use it on a higher level as well

*Eco-Roll: when the Eco-Roll function is used, the control automation shifts the gear to roll in neutral and thereby save fuel.

WHERE DO I ACCESS THE NEW DRIVING STYLE SERVICE?

We automatically provide access to our new service for all our Customers subscribed to the driving style analysis service with no additional payment obligation, of course.

You can access the new service as follows:

1. If you have been using the service by logging in at the webeye.eu website so far: You can access the new service as usual, by typing your user name and password and clicking on the login menu at the webeye.eu website. After login, in the menu click on the 'Driving Style NEW' menu item below the Driving Style.

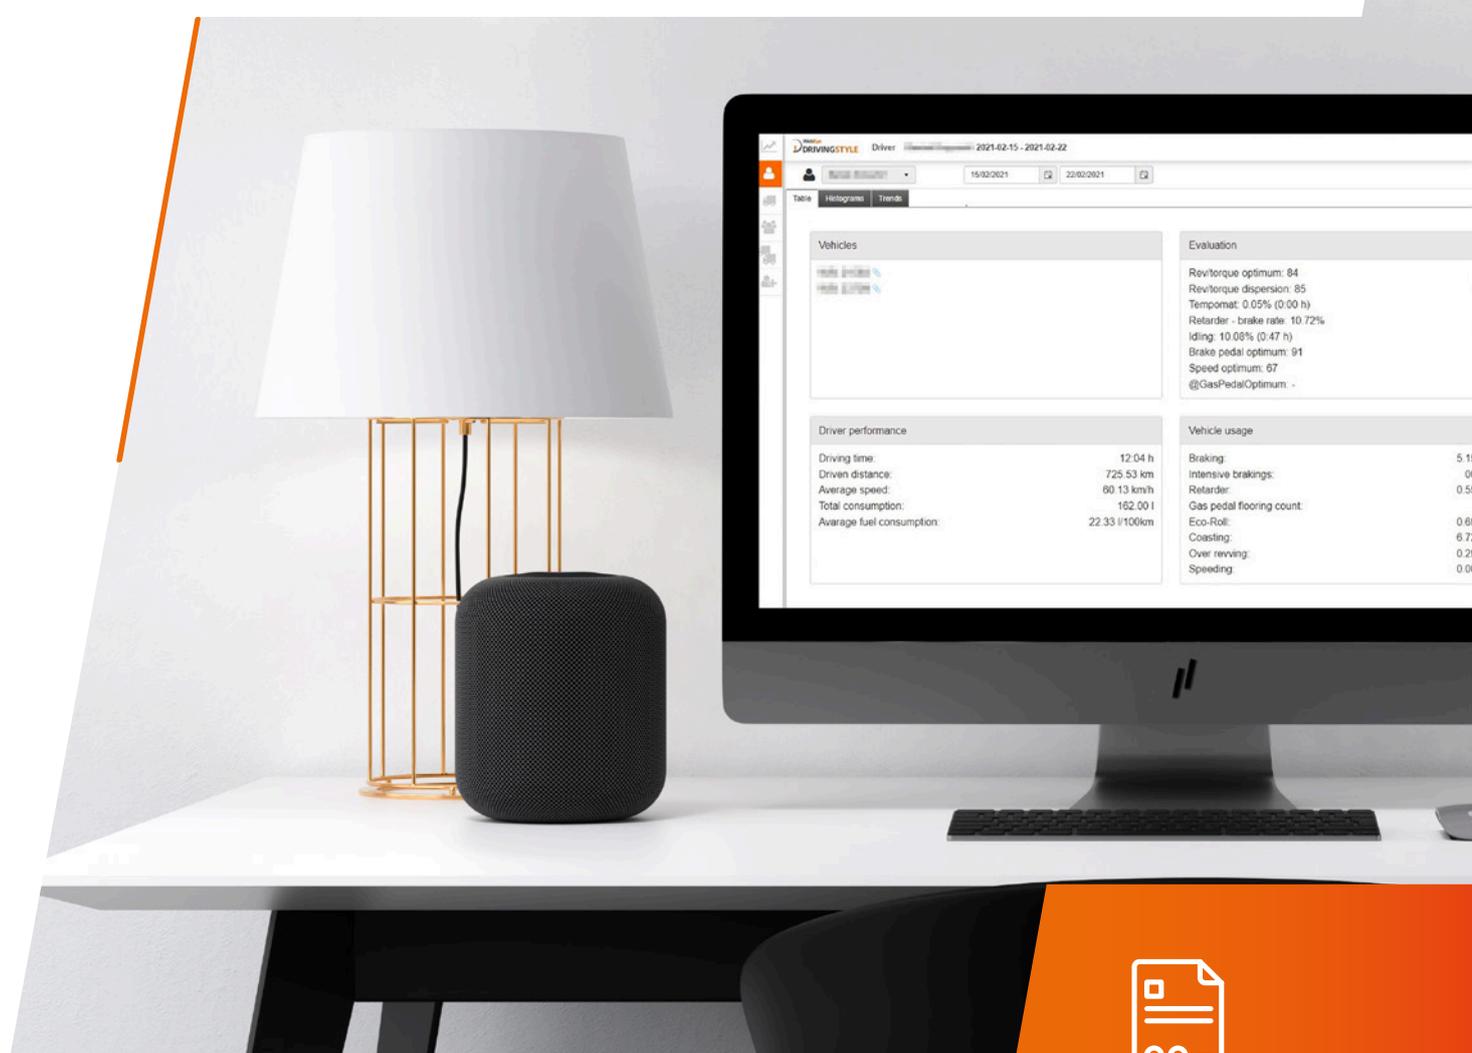

2. If you have not been using the central Webeye.eu website to log in but a separate Driving Style link (drivingstyle.webeye.eu or daf-drivingstyle.webeye.eu):

Access has become simpler for you. Similarly to how the basic service is available, we have featured the 'Driving Style NEW' service at the login menu on the webeye.eu website. You will not need a separate Driving Style user name and password to use this, just enter the user name and password you use to log in to the Monitor and click on the „Driving Style NEW“ menu item to navigate to the new platform.

WHY DO I SEE DIFFERENT DATA WHEN USING THE OLD AND THE NEW DRIVING STYLE SERVICE, WHY HAS MY DRIVERS' RATING CHANGED?

The new platform allows further filtering and enhanced accuracy of data, the refinement of the evaluation algorithm and to make modifications that can make analysis of drivers' driving style even more objective. One good example is the integration of the mentioned Eco-Roll data into the evaluation algorithm, which results completely purified idling data. The above changes are the reason that you may find different data/ratings for the same period and driver/vehicle in the old and the new system. As the data have become more reliable and objective, it is recommended to use the new service in the future and to regard the data provided by the new Driving Style as defining.

WILL I NO LONGER BE ABLE TO USE THE SERVICE I HAVE USED SO FAR?

As many of our customers build the data provided by Driving Style into their evaluation system, the introduction of the new service does not mean immediate discontinuation of the earlier platform. We continue to give you the option to run reports on the old platform according to the data and algorithms you have been using so far if it is important to compare a report to earlier values. However, it is worth switching to the new Driving Style platform as soon as possible, as its use offers a higher quality service. After a transitional period of some months, the old Driving Style platform will be discontinued in the future.
